PROJECTS

PAYSLATE APP :

A modern payment solution app that has 2 user journeys (Organization & Users). A company can open a payslate account to easily receive payments from their customers, while an individual can open a payslate account to easily connect with multiple organizations registered on the platform and make payments to them.

Technologies Used - Next Js, Tailwind, Javascript, Redux.

Links - <https://www.payslate.com.ng/> <https://organization.payslate.com.ng/>

Project Management App:

A platform where users can access a dashboard where they can create multiple projects. Each project can be viewed individually and a series of tasks can be created with a due date and assigned to anyone and have its progress monitored.

Technologies Used - React, Vite, Tailwind, Local storage.

Link - <https://tma-by-steve.vercel.app/>

GIFT CARD LANDING PAGE:

A fully responsive landing page of a GiftCard website from Figma Design, built and styled in 6 days with Next Js and TailwindCSS. Used GSAP library for animations.

Technologies Used - Next Js, Tailwind, GSAP, Vercel.

Link - <https://gift-card-phi.vercel.app/>

NextJS BLOG WEBSITE:

A beautiful blog website built with Next Js and hosted on Vercel. With server side rendering of a static database API file and dynamic page rendering of each blog article. Styled with tailwind Css.

Technologies Used - Next Js, tailwind, Vercel.

Link - <https://blog-by-steve.vercel.app/>

CRYPTOBASE WEBSITE:

A responsive crypto website fetched from coingecko's api as third-party, built with react js and styled with tailwind css, with an addition of a firebase backend with full user authentications and route protections.

Technologies Used - React Js, tailwind, Firebase, Coingecko API.

Link: <https://cryptobase-website.netlify.app/>

BOTTLEKING WEBSITE (Staging environment):

A responsive website design deployed for testing on netlify.

Technologies Used - React js, CSS, Node js(backend)

Link: <https://bottleking.vercel.app/>
