

Chude Steve Nnamdi

Frontend Engineer with 6+ years of experience building fintech, banking, payments and SaaS applications using React, Next.js, TypeScript and React Native. Proven track record delivering secure, scalable web and mobile solutions for financial institutions including Keystone Bank. Experienced collaborating with cross-functional teams to deliver high-performance customer-facing products from concept to production. Software solutions I have built include fintech payment platforms, health-tech systems and logistics applications.

EXPERIENCE

Keystone Bank Limited, Lagos — Frontend Developer

MARCH 2025

- Developed and enhanced Keystone Bank's Retail Internet Banking platform serving thousands of customers, implementing account management, transfers, bill payments, transaction history and self-service banking features using React, TypeScript and modern frontend architecture.
- Contributed to the revamp of the **KeyMobile app** using **React Native**, implementing a complete UI upgrade, integrating new features, and integrating with .NET API's.
- Implemented features including account management, fund transfers, bill payments, beneficiary management, transaction history, profile management, and self-service banking operations.
- Integrated frontend applications with banking APIs to support real-time transaction processing and customer account services.
- Built responsive and user-friendly interfaces using modern frontend technologies while ensuring security, performance, and accessibility standards.
- Collaborated with product, backend, QA, and business stakeholders to deliver new digital banking features and improve customer experience.
- Contributed to platform enhancements, bug resolution, production support, and continuous improvement of digital banking services.

Tezza Business Solution, Lagos — Frontend Developer (Contract)

OCTOBER 2023 - DECEMBER 2025

- Engineered and maintained key features for Incite360, a survey Platform-as-a-Service (PaaS) product, enabling businesses to create, distribute, and analyze smart surveys that transform customer data into actionable growth insights.
- Led the front-end development of a Virtual Menu web application, allowing restaurants to create digital menus, generate dynamic QR codes for different menu sets, and collect instant customer feedback to gauge performance.
- Utilized React, Next.js, and Tailwind CSS to build scalable, responsive, and high-performance web applications.
- Reduced unnecessary component re-renders through state management optimization, improving UI responsiveness and reducing load times across key user journeys.

TECHNOLOGIES

- HTML 5
- CSS 3
- Tailwind
- Javascript
- Typescript
- React js
- Next js
- React Native
- Expo
- React Query
- Netcore
- Git
- Zustand
- Redux
- React Hooks
- Node.js
- Jira
- Version Control with Git and Github.
- Test-Driven Development.
- Agile Methodologies.

CERTIFICATIONS

- SCRUM Fundamentals Certified

- Integrated front-end applications with back-end RESTful APIs built with Node.js, ensuring robust data flow and functionality.

HuiosPay Limited — Frontend Developer

JUNE 2023 - JANUARY 2025

- Building the Payslate web app which is a multipurpose payment platform for customers to sign up on and make easy payments for eg: (school fees, rent, subscriptions, etc).
- Built multiple Fintech applications on the mobile with react native expo.
- Working with React, Next Js and Tailwind CSS.
- API Integration with the backend server to implement all functionalities as relates to the Payslate website.

Bottleking Nigeria Ltd, Lagos — Fullstack Developer (Hybrid)

AUGUST 2021 - DECEMBER 2022

- Led frontend modernization efforts for BottleKing's e-commerce platform, delivering responsive user interfaces and enhancing the digital shopping experience across desktop and mobile devices.
- Developed customer-facing features including product discovery, authentication flows, account creation, login, email verification, promotional campaigns, and newsletter subscription workflows.
- Built reusable React components and integrated frontend applications with Node.js-powered REST APIs to support product catalog browsing, customer interactions, and e-commerce operations.
- Implemented marketing and analytics integrations using Google Analytics and conversion tracking to improve campaign measurement and user acquisition insights.
- Maintained and enhanced the company's Next.js-based platform, improving application stability, usability, and feature delivery.
- Collaborated with designers and backend engineers to translate business requirements into scalable frontend solutions that supported online sales and customer engagement.

PROJECTS

Retail Internet Banking:

Led frontend development and enhancement of Keystone Bank's Retail Internet Banking platform, a secure digital banking solution that enables customers to authenticate, view account information, transfer funds, pay bills, manage beneficiaries, monitor transaction history, and perform self-service banking operations online. Worked on scalable frontend architecture, API integrations, transaction workflows, security-focused user experiences, and digital banking features that supported thousands of retail banking customers across web channels.

Technologies Used - React, Typescript, tailwind, C## .Net, Core banking.

News Mobile Application :

Built a cross-platform **News Mobile Application** using **React Native (Expo)** that fetches

and displays real-time news from a live news API. The app allows users to browse up-to-date news articles with a smooth, modern user experience and intuitive navigation.

Key features include:

- Real-time news fetching from an external API
- Category and country-based news discovery
- Search functionality to find specific news articles
- Ability to like and save articles to a **Favourites** screen
- News filtering for personalized content
- Clean, responsive UI with smooth animations and transitions
- Optimized state management for saved and liked articles

The app was built with a strong focus on **performance, usability, and visual polish**, and was packaged into an **APK** for Android distribution.

PAYSLATE APP :

A modern payment solution app that has 2 user journeys (Organization & Users). A company can open a payslate account to easily receive payments from their customers, while an individual can open a payslate account to easily connect with multiple organizations registered on the platform and make payments to them.

Technologies Used - Next Js, Tailwind, Javascript, Redux.

Incite 360:

A survey Platform-as-a-Service (PaaS) product, enabling businesses to create, distribute, and analyze smart surveys that transform customer data into actionable growth insights with an added AI feature for pro plan users.

Technologies Used - React, Next Js, Tailwind, Redux, Gemini.

Link - [Incite360](#)

GIFT CARD LANDING PAGE:

A fully responsive landing page of a GiftCard website from Figma Design, built and styled in 6 days with Next Js and TailwindCSS. Used GSAP library for animations.

Technologies Used - Next Js, Tailwind, GSAP, Vercel.

Link - [Gift Cards App clone](#)

BOTTLEKING WEBSITE:

Contributed to the development and enhancement of BottleKing's online beverage retail platform, enabling customers to browse products, explore promotions, manage accounts, and purchase beverages through a seamless digital experience. Delivered responsive user interfaces, integrated backend APIs, implemented authentication workflows, and supported marketing analytics integrations to improve customer acquisition and

engagement.

Technologies Used - React, Next.js, JavaScript, Node.js, REST APIs, Google Analytics
